WHO SHOULD ATTEND

Anyone who works at, around or above an aseptic line

- New operators before their first aseptic process simulation
- Quality-assurance staff who review batch records and deviations
- Engineers who maintain isolators, freeze-dryers and filling machines
- Microbiologists moving into production support
- Project managers preparing a technology transfer

"I had read Annex 1 three times. After two days at the isolator I finally understood it."

JOANNA KERRIGAN-ITO
QA specialist, Brightfold Biologics

12

participants at most per session, so that everyone spends at least five hours at the glove ports.

One trainer for every four participants whenever the isolator is open, with a second trainer outside the glass.

WHERE WE TEACH

A real isolator, never used for product

The Academy trains on a full-size, two-module isolator at Ardelle Park, identical to production line Q1 but reserved for teaching. Participants gown, decontaminate, intervene and fill media under real conditions, with trainers watching from both sides of the glass.

14 Weir Lane, Ardelle Park AR4 2QL. Twelve minutes on foot from Ardelle Park station; free parking on Weir Lane.

QUENVALE ACADEMY

21 h CPD

THREE-DAY HANDS-ON COURSE

Aseptic Processing Foundations

Contamination control, glove-port technique and media fills, taught at a real isolator by the people who run commercial lines.

NEXT SESSIONS 2027

12–14 January · 9–11 March · 4–6 May

What you will learn

By the end of the three days you will be able to:

- explain the contamination control strategy of an isolator line, from air handling to glove integrity
- gown for Grade B and pass a gowning qualification with contact plates
- run and interpret a VHP decontamination cycle, indicators included
- use first-air technique and perform the standard inherent interventions through glove ports
- recognise a corrective intervention and document it correctly
- take part in an aseptic process simulation and read its results
- investigate an environmental excursion with a structured method

BEFORE YOU COME

No aseptic experience is needed. You must be fit to gown for Grade B; bring safety shoes and leave jewellery at home.

FORMAT

40 % classroom · 60 % practical

Course material in English. Trainers also speak French, German and Dutch. Gowns, lunches and certificates are included.

COURSE SCHEDULE

Three days, one isolator

Time	Session	Where
DAY 1 · FOUNDATIONS		
08:45	Welcome; contamination sources and routes	Classroom
11:00	Cleanroom behaviour and gowning	Grade C
14:00	Anatomy of an isolator: air, pressure, ports	Hall
16:00	Gowning qualification with contact plates	Grade B
DAY 2 · INSIDE THE ISOLATOR		
08:45	VHP decontamination: cycle and indicators	Hall
10:30	Glove ports, glove changes, integrity tests	Isolator
14:00	First air and aseptic technique	Isolator
16:00	Interventions: inherent and corrective	Isolator
DAY 3 · PROVING IT		
08:45	Environmental monitoring and trending	Laboratory
10:30	Aseptic process simulation, media fill	Isolator
14:00	Deviations and investigations, case work	Classroom
15:30	Assessment, feedback and certificates	Classroom

Sessions in **coral** take place at the training isolator.

Certificate. Participants who pass the final assessment receive a Quenvale Academy certificate and a record of the practical exercises completed, which most employers accept as evidence of initial aseptic training.

DIETARY OR ACCESS NEEDS

SESSION

- ☐ 12–14 January 2027
- ☐ 9–11 March 2027
- ☐ 4–6 May 2027

Fee €1 450 per participant, lunches and gowning included. Ten per cent off for three or more participants from one company.

Return this panel to academy@quenvale.example or post it to Quenvale Academy, 14 Weir Lane, Ardelle Park AR4 2QL. We confirm within two working days.
